

proGanix Premium (2-0-4) for Citrus and Tropical Fruit

proGanix Premium is a micro-nutrient rich natural liquid fertilizer, designed to introduce microbial activity in the soil profile and tree canopy, increase nutrient availability and enhance growth, in spite of stress caused by citrus greening (HLB) or other infections.

Soil probiotic: A wide array of safe soil-replenishing bacteria, which are part of the nitrogen and carbon cycles. This powerful three-in-one fertilizer is designed to improve nutrient uptake, root development, and disease resistance.

Unlock Stored Nutrients: Develop mycorrhizal networks, bringing nutrients such as phosphates to your root system, while forming a protective barricade against various root-feasting pests.

Natural Humates: Increase the cation exchange capacity of the soil to facilitate nutrient absorption, prevent water and nutrient loss in light sandy soils, and chelate heavy metals, making them less available for plant uptake.

Benefits

With **proGanix Premium** you can expect:

- Increased crop yield and less fruit drop
- Roots that grow faster, and with more volume
- A healthy, uniform bloom
- Cleaner fruit and foliage
- A more insect-resistant and infection-resistant crop
- Your community and co-workers to appreciate your environmental commitments

GUARANTEED ANALYSIS

Total Nitrogen (N)	2%
(2% water soluble)	
Available Phosphoric Acid	0%
(P ₂ O ₅)	
Soluble Potash	4%
(K ₂ O)	

proGanix Premium contains various manures with soil amending properties that enhance plant growth.

Derived from: Composted horse manure, cow manure, poultry manure and potassium sulfate.

APPLICATION GUIDELINES

Trees over 15 feet:
6 to 8 oz. / 1,000 ft² every 7 to 10 days

Trees 5 to 15 feet:
3 to 5 oz. / 1,000 ft² every 7 to 10 days

Maintenance rate (autumn):
1.5 to 2.5 oz. / 1,000 ft² every 7 to 10 days

DILUTION

Recommended dilution for all above rates:
220 to 294 oz. / 1000 ft² (60 to 100 gallons / acre)

Recommended application:
The best time to apply is before 11am and after 2.30pm.
Apply at sunset for optimal results.

To ensure multi-year shelf life, avoid UV radiation (direct sunlight).
