

proGanix Preventys (0-0-4) for Citrus and Tropical Fruit

proGanix Preventys is a micro-nutrient rich natural liquid fertilizer, designed to introduce microbial activity in the tree canopy and fruit, and increase stomal activity.

Foliar probiotic: Safe soil-replenishing bacteria work on the simple principle of competitive exclusion with infections brought to trees such as greening (HLB). This solution reduces the harmful impact of pests, such as leaf miner, *Diaprepes abbreviatus*, and *Diaphorina citri* (psyllids).

Deliver Nutrients: Recent research has shown that for certain trees, such as oranges, some nutrition uptake can occur via both the xylem and phloem. This is an important first-step in any remedial or restorative health program.

Natural Adjuvant (sticker): Increase the time that moisture and beneficial microbes protect and live on your foliage, both above and below the leaf, with **Preventys**, deployed by any jet or misting sprayer.

Benefits

With **proGanix Preventys** you can expect:

- Reduction of detrimental pathogens, such as canker and greening
- Sweeter and more flavorful fruit
- Increased fruit yield
- Easy integration with your pre-existing pesticide regimen
- Pesticide reduction
- Your community and co-workers to appreciate your environmental commitments

GUARANTEED ANALYSIS

Total Nitrogen (N)	0%
Available Phosphoric Acid	0%
(P ₂ O ₅)	
Soluble Potash	4%
(K ₂ O)	

proGanix Preventys contains various manures with soil amending properties that enhance plant growth.

Derived from: Composted horse manure, cow manure, poultry manure and potassium sulfate.

APPLICATION GUIDELINES

Trees over 15 feet:
.2 oz. / 1,000 ft², 6 to 9 applications / year

Trees 5 to 15 feet:
.1 oz. / 1,000 ft², 6 to 9 applications / year

Resets:
.5 to .75 oz. / 1,000 ft², 6 to 9 applications / year
